Subject: GHB protocol and review of previous runs

Julie,

The GHB protocol is a work in progress and the last working draft is on my computer at home, where I can work on it undistracted. I tried to mail it into the lab last night but it didn't come through. I'll try mailing it in again but I'll bring a hard copy in tomorrow as well. I can also review previous runs with you.

I was on call today for court today and caught up with some discovery requests but have nothing for tomorrow (Wednesday) and Friday. I am at therapy Thrs morning but will be in after noon. I am available at your convenience at those intervals.

Mike
